

Tyler Gaw tylergaw.com • github.com/tylergaw • me@tylergaw.com

Designer and Software Engineer using his skills and experience to help tell stories and make technology more accessible to more people.

Experience

Limbo, limbo.io - Co-founder / Designer

February 2017–Present

Built an anonymous job platform used by hundreds of seasoned design and engineering candidates to look for their next ideal role. Used by NYPL, Patreon, MailChimp, and other organizations large and small to find high quality candidates.

Target (Contract) - Senior Software Engineer

November 2017 - April 2018

Lead a design and front end engineering effort to drastically change the way teams across Target deploy applications in custom cloud infrastructure.

The Groundwork, thegroundwork.com - Senior Software Engineer

September 2014–September 2017

Built the software that powered Hillary Clinton's 2016 Presidential Campaign. Helped lead a team of 7 front end engineers. Build products to serve dozens of nonprofits and NGOs including UNHCR and NYCHA.

Freelance - Designer & Engineer

March 2014–September 2014

Helped design the [Longform](#) iOS app. Designed and built an very funny site (no longer current) for very funny comedian Chris Gethard.

Readability (at Arc90) - Product & Design Lead

November 2011–February 2014

Lead the Readability team through efforts large and small, including a redesign and rebuild of our iOS app, website, and Chrome extension.

Arc90 - Designer & Engineer

September 2008–November 2011

Freelance - Designer & Engineer

September 2007–September 2008

Digi Craft Productions - Web Designer

September 2006–September 2007

Skills
