

## Tyler Gaw

### Experience

**StreetCred**, [streetcred.co](https://streetcred.co) - Lead Frontend Engineer / Lead Designer  
June 2018-Present

- Currently leading the design and development of our iOS/Android application built in React Native and overall design direction of the brand and product
- Helping establish high quality design and engineering best practices to grow our teams

**Limbo**, [limbo.io](https://limbo.io) - Co-founder / Designer / Front End Engineer

February 2017-February 2019

- Partner on product vision, concept, strategy, and business model
- Designed and built a slow-on-purpose profile form to help candidates take their time and think in-depth about their ideal work
- Built an intentionally minimal, progressively-enhanced JS scaffold using Gulp, Rollup.JS, and ES2015

**Target (Contract)** - Lead Designer and Front End Engineer

November 2017 - April 2018

- Led a design and front end engineering effort to reimagine the way teams across Target deploy applications in a cloud infrastructure
- Conducted user and stakeholder interviews to discover shortcomings of existing deployment solutions
- Helped a DevOps team set standards and expectations for collaboration on GitHub issues, user stories, and documentation

**Timshel/The Groundwork** - Senior Software Engineer / Front End Lead

September 2014-September 2017

- Built software that powered Hillary Clinton's 2016 Presidential Campaign responsible for 9MM donations totalling \$600MM
- Led a remote team of 7 engineers and designers. Conducted team meetings, helped define and clarify OKRs, and set expectations
- Built the front end event system for hillaryclinton.com used by over 14,000 to RSVP for the campaign kick-off rally in NYC

**Freelance** - Designer & Engineer

March 2014-September 2014

- Worked with [Longform](https://longform.co) to design their iOS app and marketing materials

**Readability (at Arc90)** - Product & Design Lead

November 2011-February 2014

- Led a team of five engineers and designers. Held 1-on-1s, set and kept project pace. Worked with the CEO to define and execute vision
- Oversaw a redesign of our iOS app, site, and Chrome extension

**Arc90** - Designer & Engineer

September 2008-November 2011

Multifaceted designer & engineer. I have deep knowledge and expertise of technology earned through 14 years of hands-on client and product work.
