Tyler Gaw

Experience

StreetCred, streetcred.co - Lead Front-end Engineer / Lead Designer
June 2018-May 2020

- Pitched, nurtured and executed product features to help grow and support our community of players
- Led the design and development of our iOS/Android application built in React Native
- Established high quality design and engineering best practices to grow our team

Limbo, limbo.io - Co-founder / Designer / Front-end Engineer
February 2017–February 2019

- Partner on product vision, concept, strategy, and business model
- Designed and built a slow-on-purpose profile form to help candidates take their time and think in-depth about their ideal work
- Built an intentionally minimal, progressively-enhanced JS scaffold using Gulp, Rollup.JS, and ES2015

Target (Contract) - Lead Designer and Front-end Engineer
November 2017 - April 2018

- Led a design and front end engineering effort to reimagine the way teams across Target deploy applications in a cloud infrastructure
- Conducted user and stakeholder interviews to discover shortcomings of existing deployment solutions
- Helped a DevOps team set standards and expectations for collaboration on GitHub issues, user stories, and documentation

Timshel/The Groundwork - Senior Software Engineer / Front-end Lead
September 2014–September 2017

- Built software that powered Hillary Clinton's 2016 Presidential Campaign responsible for 9MM donations totalling $600MM
- Led a remote team of 7 engineers and designers. Conducted team meetings, helped define and clarify OKRs, and set expectations
- Built the front end event system for hillaryclinton.com used by over 14,000 to RSVP for the campaign kick-off rally in NYC

Freelance - Designer & Engineer
March 2014–September 2014

- Worked with Longform to design their iOS app and marketing materials

Readability (at Arc90) - Product & Design Lead
November 2011–February 2014

- Led a team of five engineers and designers. Held 1-on-1s, set and kept project pace. Worked with the CEO to define and execute vision
- Oversaw a redesign of our iOS app, site, and Chrome extension

Arc90 - Designer & Engineer
September 2008–November 2011

Multifaceted designer & engineer. I have deep knowledge and expertise of technology earned through 14 years of hands-on client and product work.
